Dear Hiring Manager,

I would like to introduce myself as an applicant for the Data Scientist position at Amazon, a prestigious and reputable name in e-commerce. I am confident in my ability to perform as a Data Scientist at Amazon due to my extensive education and work experience.

During my work experience at DK Cosmetics, I had an extensive range of responsibilities including selecting features, optimizing classifiers, mining data, expanding the company's data by incorporating third-party sources, improving data collection techniques, processing data, and doing ad-hoc analyses. As a Data Scientist, I was required to have excellent communication skills, understanding of algorithms, excellence in the MatLab tool kit, proficiency in GGplot, knowledge of SQL, and excellence in applied statistics. During my four-year tenure at Kiss Products, I applied these skills daily and performed exceptionally at the company.

My abilities as a Data Scientist are rooted in a sturdy education in statistics. I began with a master's degree in M.B.A from Sungkyunkwan University. I completed the Python Data Science course in General Assembly and Data Science course in Springboard. I attribute my success as a Data Scientist in large part to this extensive and in-depth education. I believe my personality has also played a major role in my ability to succeed in this career. I am extremely analytical, data-oriented, and calculated. Even in my personal life, I like to look at the data before making a decision. I like to analyze outcomes.

I would like to thank you for taking the time to review my application. I look forward to hearing more about Amazon and the details of the Data Scientist position. I feel that my education and experience will ensure my success in this role.

Sincerely,

Daniel Kim
